RCH At-A-Glance

Year Founded: 1992

Offices: Philadelphia, PA Headquarters, Boston, MA, San Diego, CA, Brussels, Belgium

Executive Leadership:

Michael Riener – Chief Executive Officer

Adrien Philip Eschallier – Chief Technology Officer

David Boekel – Chief Operating Officer

Industry Segments Served:

Life Sciences and Healthcare

Clients Supported:

Among the top 50 Pharma, Biotech, and Healthcare companies globally

Services Provided:

Advisory Services

Better guidance and support for both short- and long-term computational science initiatives developed by unmatched focus, expertise, and experience in the unique space where science and IT overlap.

Managed Services

A unique, full-service model for strategy and execution that flips the typical staff augmentation model on its head to maximize flexibility, accountability, continuity and, ultimately, results.

Hardware and Software

VAR and support provider for a range of commercial, proprietary, and cloud-based solutions essential to enterprise/R&D IT and research science needs.

RCH Customers ...

- Include 8 of top 10 Life Sciences companies
- Report 100% satisfaction
- Experience 240% better ROI with RCH
- Report 20X faster resolution and completion of customer projects

Why RCH is Different

Finding the right partner for computational science needs is critical to the advancement of innovation. We approach each initiative, no matter how complex, with the attention to excellence science demands.

Depth & Breadth of Domain Knowledge: We are experts in science and technology and can talk the talk and walk the walk on both sides of the business.

Individualized Innovation: We're curious by nature and have built a culture around stretching ourselves to deliver cutting-edge solutions to each unique challenge.

Trusted Advisor: Our model for execution reimagines the typical augmented workforce, providing comprehensive guidance, support, and implementation with greater results.

Security & Stability: Our firm has the stability, experience, and resources to solve your challenges, with the scale and agility to adapt with you as you evolve.
